

Author Profiling PAN-AP-2015 - CLEF 2015 Toulouse, 8-11 September 2015

Francisco Rangel Autoritas / Universitat Politècnica de València

Fabio Celli University of Trento

Paolo Rosso Universitat Politècnica de València

Martin Potthast, **Benno Stein** Bauhaus-Universität Weimar

Walter Daelemans University of Anwerp

What's Author Profiling?

Gender?

Native language? Language Author Profile... Who is who? variety?

Personality traits?

Why Author Profiling?

Forensics	Security	
Language as evidence	Profile possible delinquents	S

Segmenting users

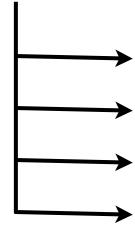

Marketing

Task Goal

To identify age and gender

Personality Traits

Languages

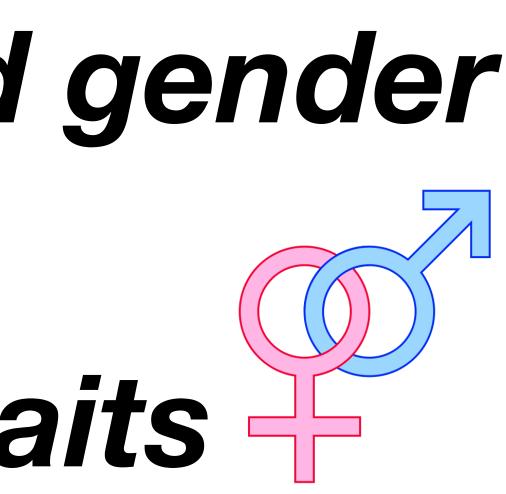

Conscientiousness

y,

ersio

greeableness

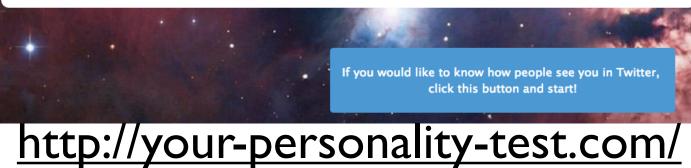

- ➤ English → Spanish → Italian
 - Dutch

Data collection and labeling

- We provided an online test to collect Twitter users:
 - Age and gender were provided by users.
 - Personality traits were selfassessed with the BFI-10 online test.

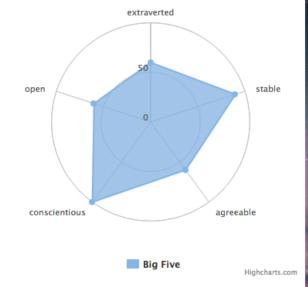

- It was hard to make users respond to the test:
 - We launched advertisments campaigns.
 - We had a high number of visits to our online test.
 - But only few people answer the test.

This is how people see @kicorangel on Twitter!

Corpus

Gender

Male vs. Female

Age Groups

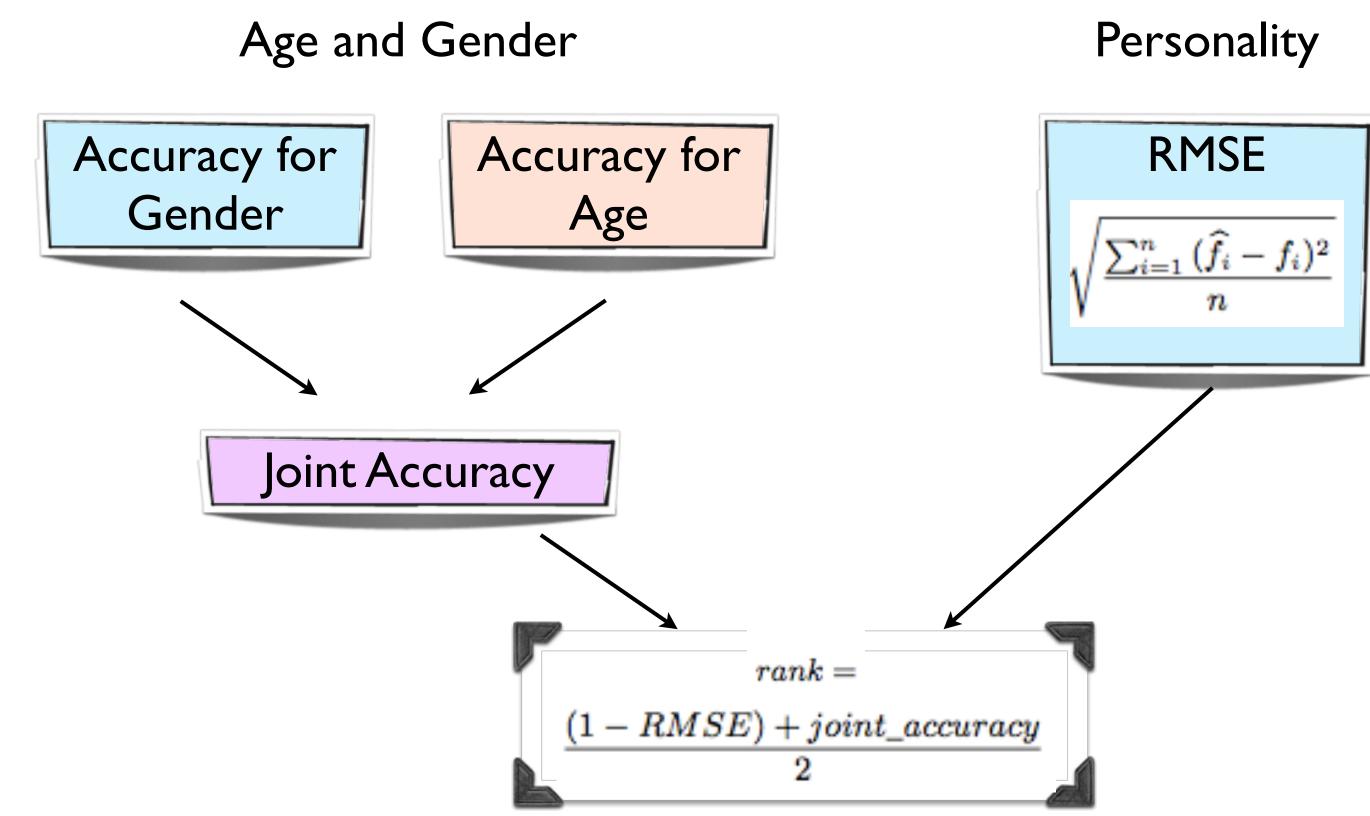

18-24; 25-34; 35-49; 50+

Personality Traits

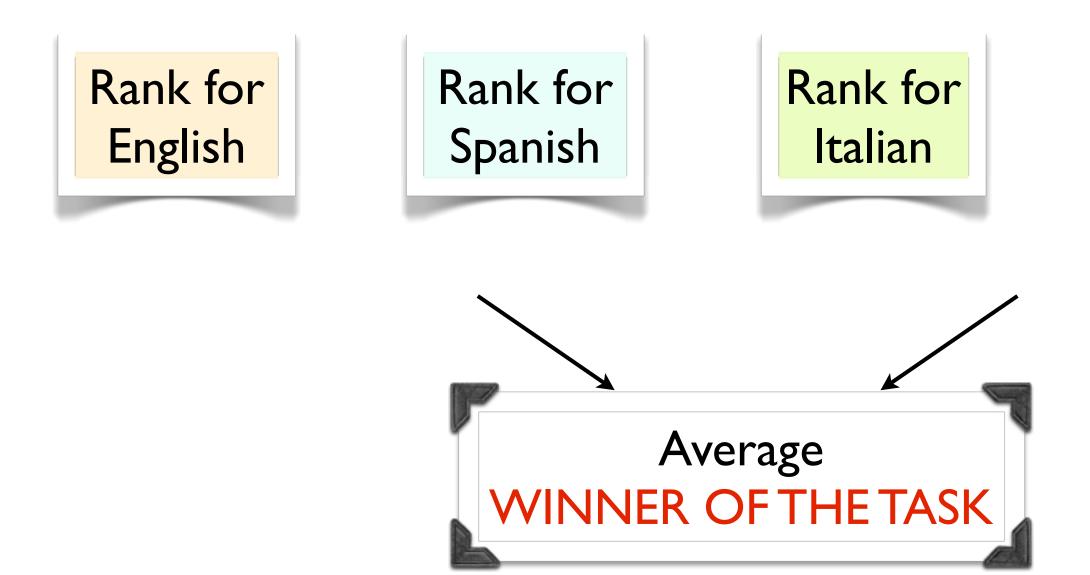

Extraversion Stable Agreeableness Conscietiousness Openness

Evaluation measures

Participants' ranking

Rank for Dutch

Statistical significance

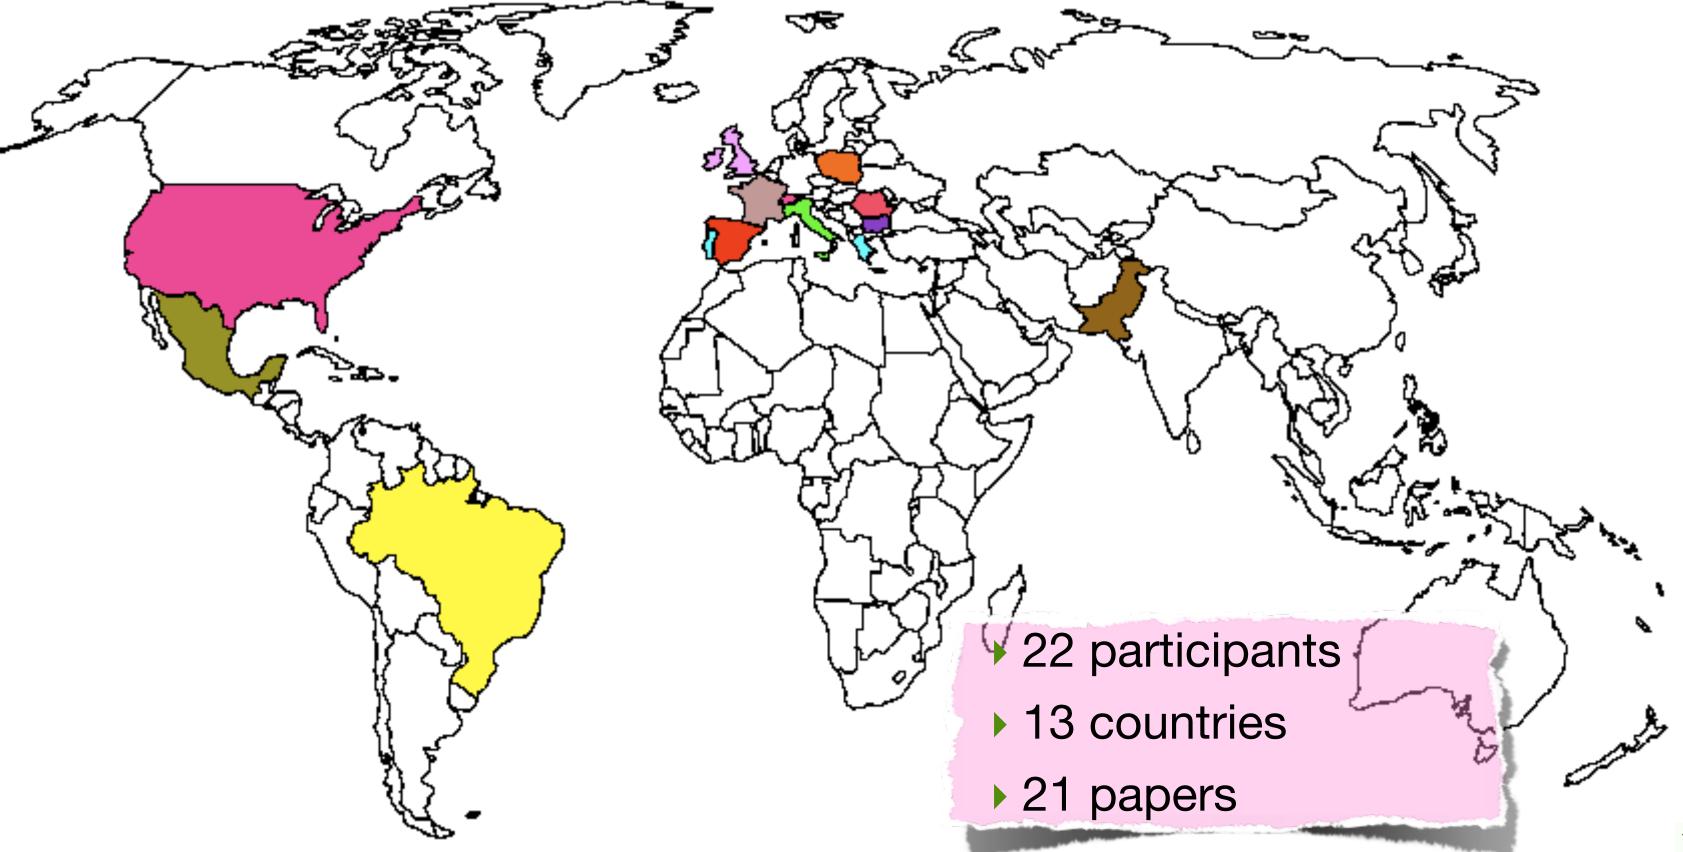

*Eric W. Noreen. Computer intensive methods for testing hypotheses: an introduction. Wiley, New York, 1989.

Pairwise comparison of accuracies of all systems

p < 0.05 -> the systems are significantly different

Participants

Approaches

What kind of ...

Features

... did the teams perform?

Approaches

HTML Cleaning to obtain plain text	[arroju][grivas][cheema][ashraf]					
Hashtags, urls, mentions	[arroju][gonzalezgallardo][grivas][maharjan][nowson]					
Remove RT and shares	[bartoli][poulston]					
Lowercased, remove numbers and stopwords	[weren]					
Emojis	[nowson]					
Remove tweets <5 words	[markov]					
SVM for Feature Selection	[miculicich]					
Recursive Feature Extraction	[guyon]					

Features

punctuation signs	[miculicich][mezaruiz][ameer]					
emoticons	[nowson] [mezaruiz] [markov][teisseyre]					
word length	[grivas]					
sentence length	[ameer]					
character flooding	[gimenez][kiprov][nowson]					
verbosity	[sulea]					
letter case	[gimenez][grivas] [kiprov]					
question marks, question sentences	[maharjan] [ameer]					

Approaches

Features

Specific Twitter elements: hashtags, links, mentions	[gimenez][grivas] [nowson] [me			
Latent Semantic Analysis	[maharjan][mcco [poulsto			
Family Tokens (my wife/husband, my girlfriend/boyfriend)	[mał			
Most discriminant words among classes	[che			
Named Entities	[no			

[kiprov][miculicich] ezaruiz] [markov] collister][miculicich] on][ashraf] harjan] neema] owson]

character n-grams	[gonzalezgallardo
word n-grams	[arroju] [gimenez] [mez
tf-idf n-grams	[gimenez][grivas]
POS n-grams	[gonzalezgalla
lemmas, words, relations, POS n-grams	[ma

o] [maharjan][sulea]

z][cheema] [nowson] ezaruiz]

s] [mezaruiz] [sulea]

ardo] [mezaruiz]

arkov]

LIWC	[arroju] [bartoli][miculicich]
NRC	[gimenez][kiprov]
Polarity, emotions	[gimenez] [kiprov][nowson] [mezaruiz] [teisseyre]
Irony, Taboo	[mezaruiz]
IR features: cosine similarity, Okapi BM25	[weren]
LDA + Second order representation	[alvarezcarmona]

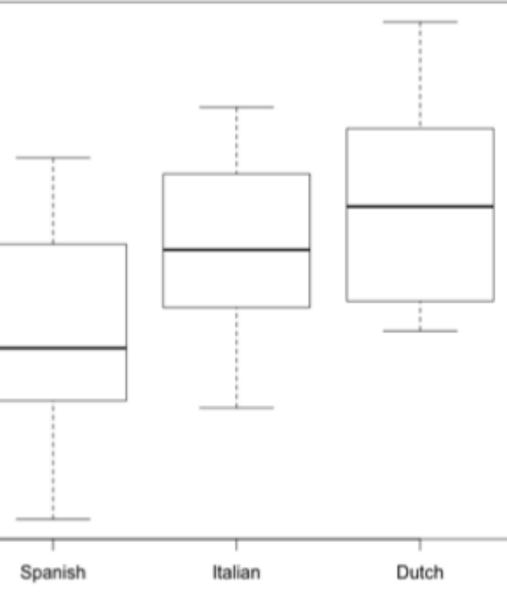

Approaches

	Support Vector Machines	l [gonzalezgallardo][cheema][markov][grivas] [kiprov][nowson] [poulston][bartoli]				
Age and Gender	Random Forest	[mezaruiz][ashraf]				
	Rotation Forest	[mccollister]				
	Support Vector Machines	l [gonzalezgallardo][cheema] [markov]				
	Random Forest	[bartoli]				
	J48	[mezaruiz][ashraf]				
	Rotation Forest	[mccollister]				
Personality Traits	Linear Discriminant Analysis	[miculicich]				
	SGD	[arroju]				
	Linear Regression	[gimenez]				
	Ridge for Regression	[sulea]				
	Logic Regression	[maharjan]

3rd.

Conclusions

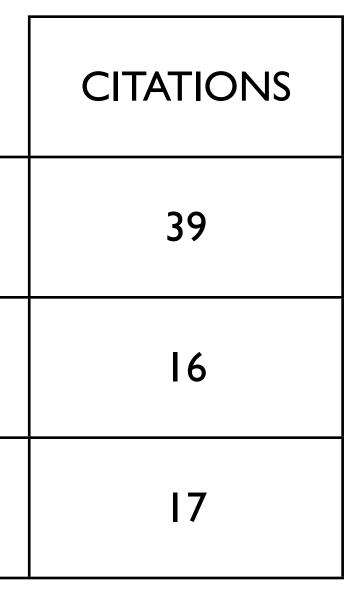

- Wrt. age and gender identification
 - The highest accuracies in gender identification were achieved in Dutch and Spanish with values over 95%
 - In comparison to previous years of PAN, the systems achieved significantly higher accuracy values for both age and gender identification.
 - This may suggest the number of tweets per author is sufficient to profile age and gender with high accuracy
- With regard to personality traits, the lowest errors were obtained for Dutch and Italian, with values below 5% for most traits.
 - The Stable trait appears the most difficult one to be predicted.
- Regarding the features it is difficult to highlight the most important ones, simply because the high number of different ones used and combined by the participants.
 - This year again the Second Order Representation proposed by alvarezcarmona15 obtained the best results.
 - representations based on n-grams, such as the one proposed by gonzalesgallardo15 or by grivas15, were ranked among the top three in every lan- guage.

Task impact

Overview of the Author Profiling task at PAN 2013

Overview of the 2nd. Author Profiling task at PAN 2014

Overview of the 3rd. Author Profiling task at PAN 2015

...and growing!!

Industry at PAN (Author Profiling)

On behalf of the AP task organisers: Thank you very much for participating! We hope to see you again next year!
