

PAN@CLEF 2022

Style Change Detection Task

Eva Zangerle, Maximilian Mayerl, Martin Potthast, Benno Stein

Given a document,
find the **positions**
at which the **authorship changes**.

Style Change Detection Task

Looking back...

2017

Is the document multi-authored? If yes, find the positions of switches.

2018

Is the document written by a single or multiple authors?

2019

Is the document multi-authored? If yes, find the positions of switches.
How many authors have collaborated on the document?

2020

Is the document multi-authored? For each pair of paragraphs, is there a style change between them?

2021

Is the document multi-authored? For each pair of paragraphs, is there a style change between them? Assign all paragraphs to an author id.

Task Description

[Task1] Style Change Basic: for a text written by two authors that contains a single style change only, find the position of this change (i.e., cut the text into the two authors' texts on the paragraph-level),

Task Description

[Task2] Style Change Advanced: for a text written by two or more authors, find all positions of writing style change (i.e., assign all paragraphs of the text uniquely to some author out of the number of authors assumed for the multi-author document)

Task Description

[Task3] Style Change Real-World: for a text written by two or more authors, find all positions of writing style change, where style changes now not only occur between paragraphs, but at the sentence level.

Task Description

[Task1] Style Change Basic: for a text written by two authors that contains a single style change only, find the position of this change (i.e., cut the text into the two authors' texts on the paragraph-level),

[Task2] Style Change Advanced: for a text written by two or more authors, find all positions of writing style change (i.e., assign all paragraphs of the text uniquely to some author out of the number of authors assumed for the multi-author document)

[Task3] Style Change Real-World: for a text written by two or more authors, find all positions of writing style change, where style changes now not only occur between paragraphs, but at the sentence level.

Task Description

Example Document A

Author 1

Duis autem vel eum iriure dolor in hendrerit in vulputate velit esse molestie consequat, vel illum dolore eu feugiat nulla facilisis at vero eros et accumsan et iusto odio dignissim qui blandit praesent luptatum zzril delenit augue dui dolore te feugait nulla facilisi. Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed diam nonummy nibh euismod tincidunt ut laoreet dolore magna aliquam erat volutpat.

Author 2

Ut wisi enim ad minim veniam, quis nostrud exercitation ullamcorper suscipit lobortis nisl ut aliquip ex ea commodo consequat. Duis autem vel eum iriure dolor in hendrerit in vulputate velit esse molestie consequat, vel illum dolore eu feugiat nulla facilisis at vero eros et accumsan et iusto odio dignissim qui blandit praesent luptatum zzril delenit augue dui dolore te feugait nulla facilisi.

Author 2

Nam liber tempor cum soluta nobis eleifend option congue nihil imperdiet doming id quod mazim placerat facer possim assum. Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed diam nonummy nibh euismod tincidunt ut laoreet dolore magna aliquam erat volutpat.

Task 1: [1,0]
Task 2: [1,2,2]

Example Document B

Author 1

Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua. Mi proin sed libero enim sed. Elit pellentesque habitant morbi tristique senectus. Venenatis lectus magna fringilla urna porttitor rhoncus dolor purus. Duis ut diam quam nulla porttitor. Est sit amet facilisis magna etiam tempor orci.

Author 2

Fringilla ut morbi tincidunt augue interdum velit euismod in pellentesque. Nisi lacus sed viverra tellus in. Est ultricies integer quis auctor. Ullamcorper velit sed ullamcorper morbi tincidunt ornare massa. Orci eu lobortis elementum nibh. Risus nec feugiat in fermentum posuere urna nec tincidunt praesent. Quam pellentesque nec nam aliquam sem et. Odio eu feugiat pretium nibh ipsum consequat. Fringilla est ullamcorper eget nulla facilisi etiam dignissim diam quis. Arcu dui vivamus arcu felis bibendum ut.

Author 2

Potenti nullam ac tortor vitae purus faucibus ornare. Ullamcorper dignissim cras tincidunt lobortis. Habitant morbi tristique senectus et. Ut ornare lectus sit amet. Amet consectetur adipiscing elit ut aliquam purus sit.

Author 3

Nibh nisl condimentum id venenatis a condimentum vitae sapien. Adipiscing enim eu turpis egestas pretium. Egestas integer eget aliquet nibh praesent tristique. Gravida quis blandit turpis cursus. Nunc id cursus metus aliquam eleifend.

Task 2: [1,2,2,3]

Example Document C

Author 1

Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua. Quis imperdiet massa tincidunt nunc pulvinar sapien et. Sit amet risus nullam eget felis, fusce ut placerat orci nulla. At in tellus integer feugiat scelerisque varius morbi enim. Aliquet nec ullamcorper sit amet risus nullam eget, fermentum leo vel orci porta.

Author 2

Molestie a iaculis at erat. Massa tincidunt dui ut ornare lectus, vitae purus faucibus ornare suspendisse sed nisi lacus sed. Cursus eget nunc scelerisque viverra mauris in. Faucibus turpis in eu mi bibendum neque egestas congue quisque. Platea dictumst vestibulum rhoncus est. Lorem sed risus ultricies tristique nulla aliquet enim tortor at. Sed velit dignissim sodales ut eu sem integer vitae. Mattis nunc sed blandit libero.

Author 3

Ac turpis egestas sed tempus urna et pharetra pharetra massa. Nibh nisl condimentum id venenatis a condimentum. Fringilla ut morbi tincidunt augue interdum velit. Enim eu turpis egestas pretium aenean pharetra magna. Turpis in eu mi bibendum. Leo dui ut diam quam nulla porttitor massa id neque. A pellentesque sit amet porttitor eget. Lectus urna dui convallis convallis tellus id interdum. Lectus proin nibh nisl condimentum id venenatis. Netus et malesuada fames ac turpis egestas integer eget. Eget velit aliquet sagittis id. Tristique et egestas quis ipsum suspendisse ultrices gravida. Sapien faucibus et molestie ac feugiat sed lectus vestibulum mattis. Nunc scelerisque viverra mauris in aliquam sem fringilla ut morbi.

Task 3: [0,0,1,0,0,0,0,0,1,....]

Dataset

- Realistic, non-artificial and comprehensive dataset
- Requirements
 - Find multiple authors that write about the same topic
 - Multi-authored texts need to contain the same topic / subtopic
 - Find texts that are freely available and of sufficient length
- StackExchange consists of several sites (topics), data freely available
- Each question/answer associated with
 - Site
 - Set of tags (subtopics)
- Example: photography site – subtopics: lens, canon, nikon, lightroom, photoshop, ...

What is the word for the edible part of a fruit with rind (e.g., lemon, orange, avocado, watermelon)?

Ask Question

Asked yesterday Active today Viewed 2k times

9

This morning I found one avocado I bought had become over-ripe: part of its edible part had changed color and was no longer green. So I was trying to describe this to my friend and I wanted to say "Hey I wanted to make some smoothie with this avocado but I found it over-ripe and part of its _____ has changed color."

I wanted to find a word to fill in the blank. I speak Chinese and in Chinese we call the edible part "fruit flesh". **I'm wondering what the English word is.**

A quick googling gave me the word "pulp", but it looks like "fruit pulp" is created by processing the "fruit flesh" and it's not the "flesh" itself.

single-word-requests

▲ As the post suggests it can be called the

34

flesh

NOUN

1.2 The edible pulpy part of a fruit or vegetable.

halve the avocados and scrape out the flesh

Calling it 'pulpy' doesn't mean it has been squashed. It means the soft part that isn't the skin/rind or pips/stone.

You don't have to call it 'fruit flesh', just 'flesh' will do when the fruit has already been mentioned.

Hey I wanted to make some smoothie with this avocado but I found it over-ripe and part of its **flesh** has changed color.

From [Lexico](#).

Dataset

- Cleaning
 - Remove links, images, code snippets, bullet lists, block quotes
 - Remove very short questions/answers
 - Remove edited questions/answers
- Randomly choose question/answer thread
- Randomly choose number of authors n in $[1,5]$
- Randomly select n authors
- Take their paragraphs in thread, shuffle, concatenate
- Check length of document (> 2 paragraphs, between 1,000 and 10,000 characters)

Dataset

Parameter	Setting
Number of authors	1-5
Document length	1,000-10,000 characters
Minimum paragraph length	100 characters
Minimum number of paragraphs	2
Change positions	Between paragraphs (tasks 1 and 2) Between sentences (task 3)
Document language	English

Task 1: 2,000 documents

Tasks 2 and 3: 10,000 documents

70:15:15 training/validation/test split

Evaluation

- Score each document by F_1 measure (macro-averaged)
- Three tasks evaluated independently
- Additionally for tasks 2 and 3:
 - Diarization Error Rate (DER): fraction of wrongly attributed paragraphs
 - Jaccard Error Rate (JER): author-specific error rate

$$JER(a) = 1.0 - \frac{|ref_a \cap pred_a|}{|ref_a \cup pred_a|}$$

Submissions

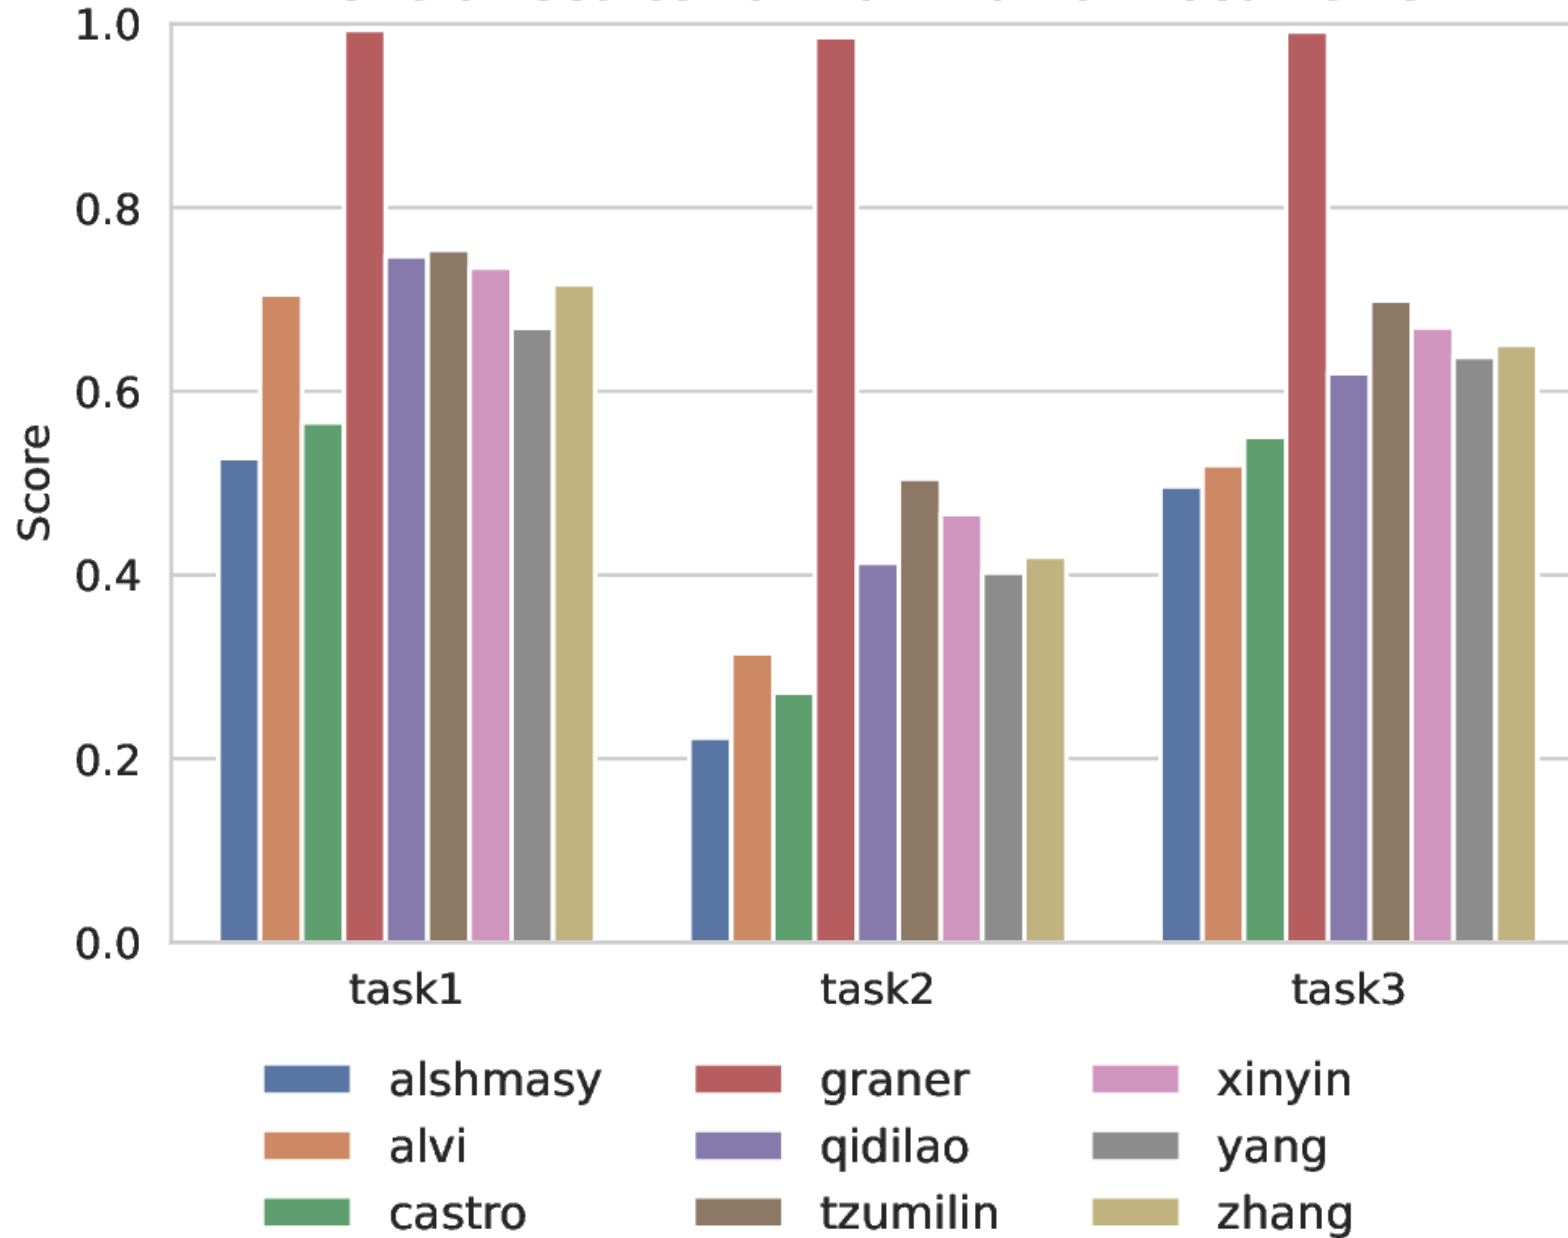

- Nine submissions (eight intrinsic, one extrinsic)
- Alshamasi and Menai (alshmasy): lexical and syntactic features, k-means clustering
- Alvi et al. (alvi): handcrafted discourse markers as features
- Jiang et al. (xinyin): Electra (masked LM), one model per task
- Lao et al. (qidilao): BERT, convolution layer, max pooling for binary class prediction
- Lin et al. (tzumilin): majority-vote ensemble of three LLMs (BERT, RoBERTa, ALBERT)
- Rodriguez-Losada and Castro (castro): transformer and lexical features, similarity for final prediction
- Zhang et al. (zhang): BERT (masked training) and prompt modeling for final prediction
- Zi et al. (yang): BERT (masked training), Bi-LSTM to capture context, fully connected layer for predictions
- Graner and Ranly (graner): extrinsic approach

Overall Scores For Single-Author Documents

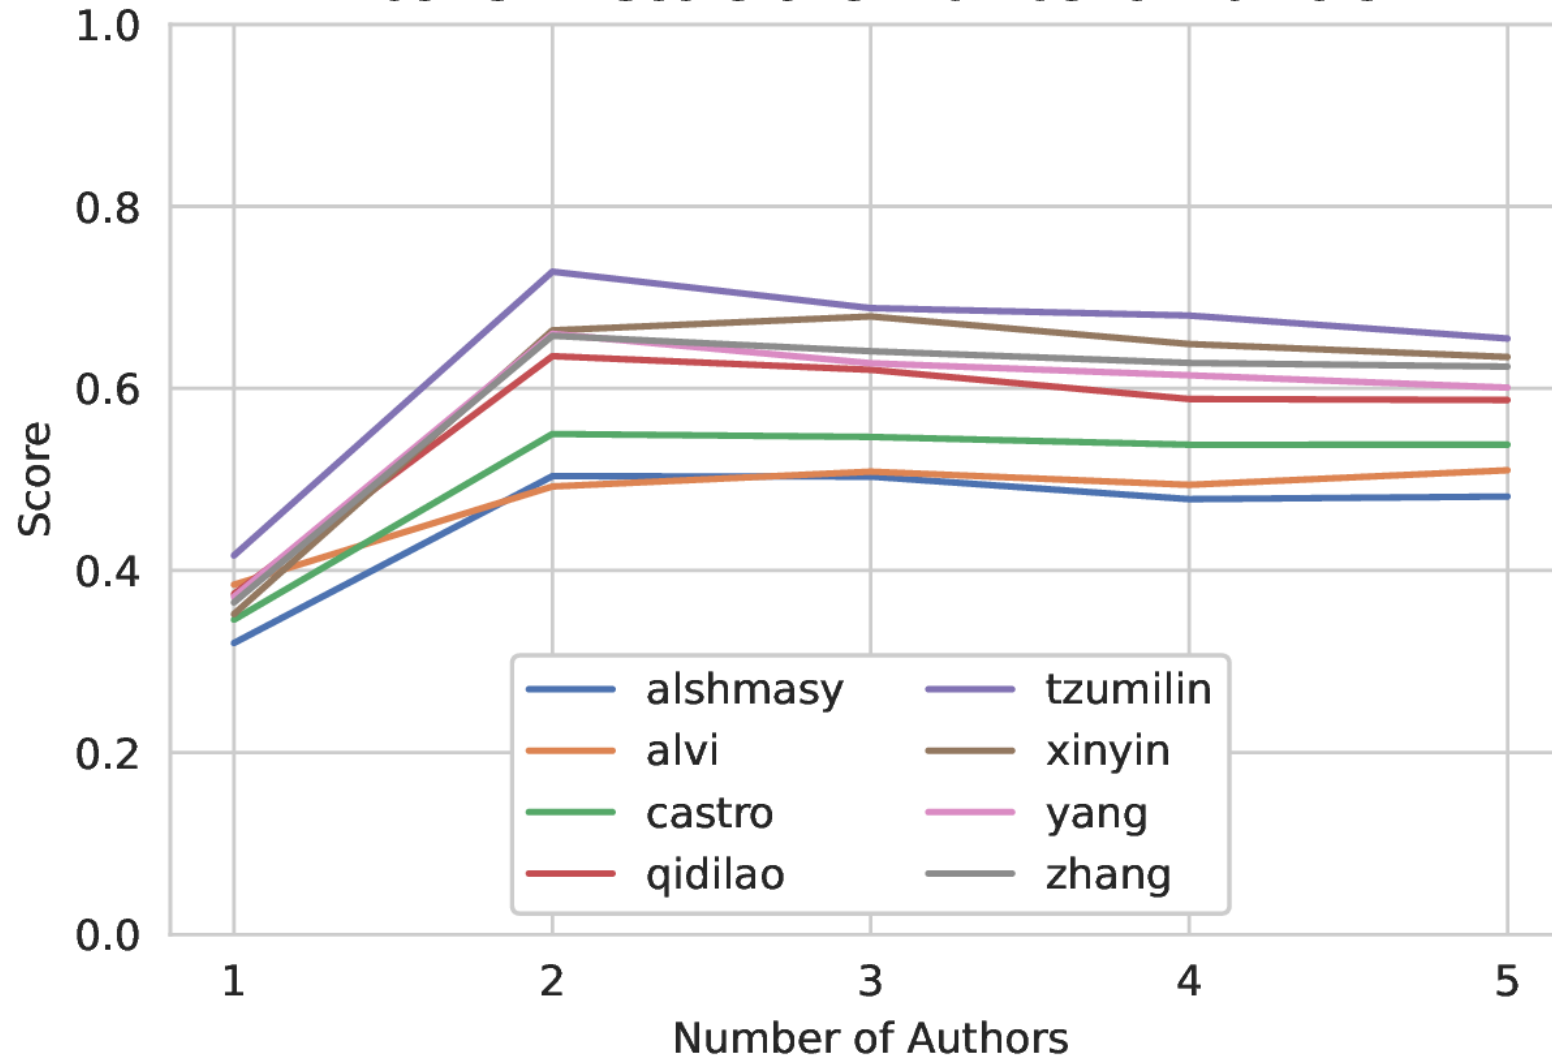

Overall Scores For Multi-Author Documents

Task 2 F1-Score Over Number of Authors

Task 3 F1-Score Over Number of Authors

Outlook PAN@CLEF 2023

- Style change detection often benefited from topic changes within documents
- Control for change of authorship and topic simultaneously
 - control for topic and style similarity in assembling documents
 - Uncover ability to capture/model style variations
- New dataset based on Reddit
- New "perspective" on task complexity: single task carried out on three datasets of increasing task complexity

Outlook PAN@CLEF 2023

Core task: Detect change of authorship on the paragraph level

1. Easy dataset: paragraphs cover a variety of topics
2. Medium dataset: topical variety is limited, focus on style information
3. Hard dataset: all paragraphs cover the same topic, focus only on style information

Outlook PAN@CLEF 2023

Core task: Detect change of authorship on the paragraph level

1. Easy dataset: paragraphs cover a variety of topics
2. Medium dataset: topical variety is limited, focus on style information
3. Hard dataset: all paragraphs cover the same topic, focus only on style information

Outlook PAN@CLEF 2023

Core task: Detect change of authorship on the paragraph level
